

You will be creating a resource to use to help you study wildlife identification for each species you are responsible for knowing in this course. You will do this by creating a set of flash cards. Create a flashcard for each of the species listed below that contains the following information:

- Front Side
 - o Minimum of one picture of the animal, preferably in their ideal habitat and in color
- Back Side
 - o Common Name
 - o Scientific Name
 - o Differences in juveniles and adults of each species (if applicable)

As we discuss additional concepts in class you will go back and add information about each species to the slides.

Reptiles & Amphibians

American Alligator	E. Diamondback Rattlesnake
American Crocodile	Garter Snake
Black Rat Snake	Gopher Tortoise
Bullfrog	Green Anole
Common Snapping Turtle	Green Tree Frog
Copperhead Snake	King Snake
Coral Snake	Loggerhead Sea Turtle
Corn Snake	Spotted Salamander
Cottonmouth Snake	Timber Rattlesnakes
E. Box Turtle	Yellow-Bellied Slider Turtle

Fish

Black Crappie	Hybrid Striped Bass
Bluegill	Largemouth Bass
Bowfin	Rainbow Trout
Brook Trout	Redbreast Sunfish
Brown Trout	Shoal Bass
Channel Catfish	Striped Bass
Flathead Catfish	Walleye
Grass Carp	

All finished work should be turned in for a grade by Wednesday, November 16, 2011 and will be returned within 24 hours for you to use as a study guide for your Fisheries & Aquatics Test on 11/18/11.
