

Directions for Creating Graphs in Excel

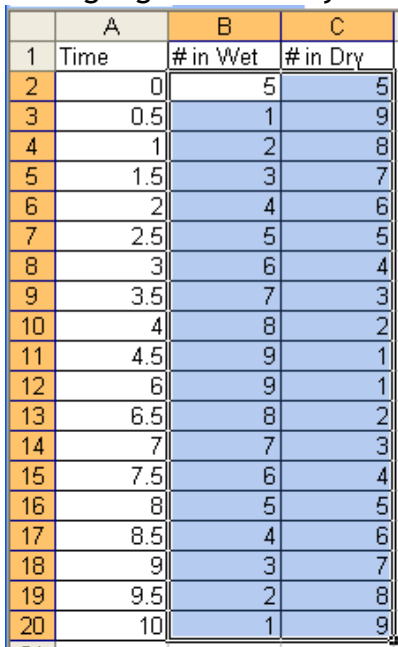

1. Enter data in 3 separate columns (Time, Number in Wet, Number in Dry)

The screenshot shows the Microsoft Excel interface with a data table. The table has four columns: A (Time), B (# in Wet), C (# in Dry), and D (empty). The data is as follows:

	A	B	C	D
1	Time	# in Wet	# in Dry	
2	0	5	5	
3	0.5	1	9	
4	1	2	8	
5	1.5	3	7	
6	2	4	6	
7	2.5	5	5	
8	3	6	4	
9	3.5	7	3	
10	4	8	2	
11	4.5	9	1	
12	6	9	1	
13	6.5	8	2	
14	7	7	3	
15	7.5	6	4	
16	8	5	5	
17	8.5	4	6	
18	9	3	7	
19	9.5	2	8	
20	10	1	9	
21				
22				

2. Highlight Wet & Dry data columns

The screenshot shows the same data table as above, but with columns B (# in Wet) and C (# in Dry) highlighted in blue. The data is as follows:

	A	B	C
1	Time	# in Wet	# in Dry
2	0	5	5
3	0.5	1	9
4	1	2	8
5	1.5	3	7
6	2	4	6
7	2.5	5	5
8	3	6	4
9	3.5	7	3
10	4	8	2
11	4.5	9	1
12	6	9	1
13	6.5	8	2
14	7	7	3
15	7.5	6	4
16	8	5	5
17	8.5	4	6
18	9	3	7
19	9.5	2	8
20	10	1	9
21			
22			

3. Click the Chart Button at the top of the screen, or go INSERT - CHART

4. Select a Line Graph and choose which one you like best - Click NEXT

5. At the top click the SERIES button

6. Name Series 1 - Click Series 2 - Name Series 2

7. At the bottom of the chart wizard go to Category (x) axis labels and select the graphing radio button

Radio Button

8. It will open this:

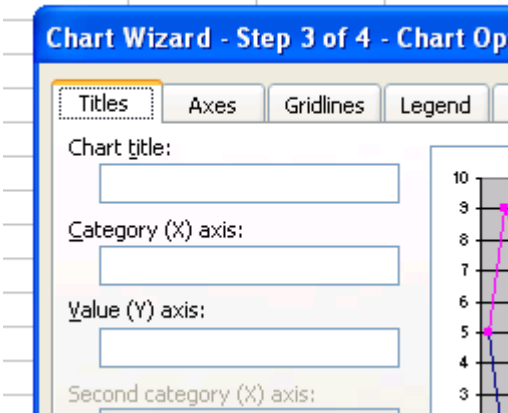

9. Use the “plus symbol” tool to highlight the time data

	A	
1	Time	# i
2	0	
3	0.5	
4	1	
5	1.5	
6	2	
7	2.5	
8	3	
9	3.5	
10	4	
11	4.5	
12	6	
13	6.5	
14	7	
15	7.5	
16	8	
17	8.5	
18	9	
19	9.5	
20	10	
21		

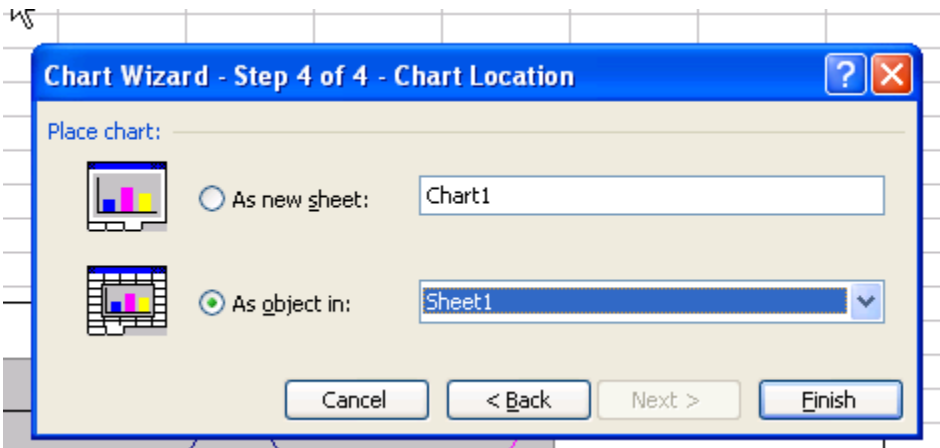

10. Click the radio Button again when you are finished and then click next on the Chart Wizard.

11. Fill in the info for Chart Title, X-Axis, Y-Axis, Click NEXT

12. Click Finish

13. Copy and Paste both the Data Table and Graph into Lab Report
